The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent Publication #2003/0004889 and US Patent #5,423,139 are cited for showing typical packages with bar codes.

Allowable Subject Matter

Claims 1-25 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest a bar code with a hole intentionally punched therethrough to accomodate a hanger for hanging a panel with an enclosure, as claimed. Feldman and Fiala show typical packages with bar codes and holes, of the type discussed by Applicant as prior art. Palmer, in the Bar Code Book, teaches at page 163 that printing defects must cover no more than 25 percent of a circle whose diameter is 0.8X. This would mean a defect cannot cover more than 25% of a narrow bar or space. This is clearly too small to accomodate a hanging hook of the type claimed. Palmer teaches away from putting any type of hole in a UPC, because this would violate ANSI MH10.8M-1983. This suggests that merchants would not accept anything with a hole in the bar code of the type taught by Applicant. This is a fundamental teaching away from Applicant's disclosure, rendering the intentional and purposeful combination of holes and bar codes as non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
